ACTA DIABETOLOGICA LATINA VOL. XVI - 1979

ACTA DIABETOLOGICA LATINA

Editorial Advisory Council:

L. Adezati, Genova
P. Brunetti, Perugia
U. Butturini, Parma
E. R. Froesch, Zürich
H. Keen, London
P. Lefèbvre, Liège
G. Lenti, Torino
R. Luft, Stockholm
H. Mehnert, München
R. Müller, Wiesbaden
G. Pozza, Milano
S. Raptis, Athenai
Ph. Vague, Marseille
B.L. Wajchenberg, São Paulo
R. S. Yalow, New York

Editorial Board:

G. Menzinger, Roma
L. Mosca, Milano
R. Navalesi, Pisa
G. Pagano, Torino
G. Tettamanti, Milano
A. Tiengo, Padova

Managing Editor:

S. Marigo, La Spezia

General Information

Publication data: ACTA DIABETOLOGICA LATINA appears four times a year. The four issues constitute one volume. Supplements (monographs or conference proceedings) are published occasionally.
Subscription price per volume US $ 60 (Lit. 50,000) including postage by surface mail.
If required issues can be sent by air mail at an extra charge of US $8 (Lit. 6,000) per volume and US $ 1.50 (Lit. 900) per single issue.
Price per single issue US $ 18 (Lit. 15,000).
Special price, only for Members of Diabetology and Endocrinology Societies, US $ 50 (Lit. 35,000) per volume.
Prices quoted do not include supplements.

Advertising: orders for advertisements should be sent to the Publishing House (see below).

Books for review: books for review should be sent to the Publishing House (see below).

Subscriptions: subscription orders can be placed with any bookstore or direct with:
Casa Editrice « IL PONTE » - Casella Postale 1071 - 20100 Milano, Italy.

ACTA DIABETOLOGICA LATINA

VOLUME XVI 1979

CONTENTS

REVIEW

E. PIMENTEL: Some aspects of the genetics and etiology of spontaneous diabetes mellitus 193

ORIGINAL CONTRIBUTIONS

B. VIALETTES, P. VAGUE, V. LASSMANN, M.-C. SIMON: Islet transplantation in diabetic rats. Long-term follow-up of glucose tolerance 1

G. SOMERS, G. DEVIS, W. J. MALAISSE: Calcium antagonists and islet function. IX. Is extracellular calcium required for insulin release? 9

G. PAGANO, M. TROVATI, W. MARTINY, A. AIRALDI, G. CANTINO, E. PISU, G. LENTI: Metabolic and hormonal changes during exercise in healthy, diabetic and obese subjects . . 19

J. M. FELDMAN, J. A. BLALOCK, L. B. FOSTER: Effects of food restriction on mice with the hereditary obese-hyperglycemic syndrome 27

L. BOQUIST: Hyperglycemia following *p*-hydroxymercuribenzoate administration to mice 35

M. ZACCARIA, E. DE PALO, E. ZAGO, N. SICOLO, G. ERLE, G. FEDERSPIL: Metabolic and endocrine responses to a standard mixed meal. A physiologic study 45

M. ZRŮSTOVÁ, F. VRABEC, J. ROŠTLAPIL: Diabetic changes of the extraocular muscles in man 55

M. MIMOUNI, T. KOIVUKANGAS, M. KARP, E. LARON: Comparison of one daily injection of NPH and crystalline PZI insulins on urinary glucose in diabetic children 63

K.-P. RATZMANN, S. KNOSPE, P. HEINKE, B. SCHULZ: Relationship between body fat mass, carbohydrate tolerance and IRI response during glucose infusion in subjects with early diabetes 67

D. Giugliano, R. Torella, S. Sgambato: A comparative study of metabolic and hormonal responses to somatostatin and propranolol in man 77

M. B. Davidson, R. G. Karjala: Lipid metabolism by muscle of diabetic rats 95

G. A. Giussi, G. Ballejo, W. L. Benedetti: Estriol serum levels, neonatal vitality and stromal villous edema in diabetic pregnancies 105

S. S. Mukerjee, P. S. R. Murthi, N. K. Garg, S. K. Mukherjee: Effect of alloxan diabetes on some aspects of lipid metabolism in albino rats 111

M. Solter, M. Sekso: Glucose-insulin interaction in obese individuals with asymptomatic reactive hypoglycemia 119

G. Pogátsa, M. Bihari-Varga, G. Szinay: Effect of diabetes therapy on the myocardium in experimental diabetes 129

L. Altomonte, A. V. Greco, G. Ghirlanda, A. G. Rebuzzi, R. Manna, A. Bertoli: Effect of somatostatin (SRIF) on plasma glucose and insulin response to glucagon in liver cirrhosis 139

G. Enzi, G. Cagnoni, A. Baritussio, F. De Biasi, L. Favaretto, E. M. Inelmen, G. Crepaldi: Effects of fat mass reduction by dieting and by lipectomy on carbohydrate metabolism in obese patients 147

G. Bolli, P. Compagnucci, M. G. Cartechini, P. De Feo, F. Santeusanio, A. Puxeddu, P. Brunetti: Urinary excretion and plasma levels of norepinephrine and epinephrine during diabetic ketoacidosis 157

V. Kalous, P. Anzenbacher: On the mechanism of the insulin-glucose interactions . . 169

C. R. Sirtori, G. Biasi, E. Malan, L. Meciani, M. Sirtori, E. Cerasi: Kinetics of insulin secretion following glucose infusion in patients with atherosclerotic peripheral vascular disease 175

V. J. McCann, R. E. Davis: Glycosylated hemoglobin concentrations in patients with diabetic neuropathy 205

I. Salama Benarroch, C. H. Scorticatti, A. Rubinstein Salama, H. Pagliere, E. Cartelli: Study of bladder function in patients with prediabetes, latent diabetes, recent onset diabetes and juvenile diabetes 211

Ch. Hasslacher, K. H. Munderloh, P. Wahl: Effect of glucose and insulin on protein and basement membrane synthesis in isolated glomeruli of diabetic rats 219

S. Forgács, Z. Kéri, J. Osváth, I. Fábián: Esophageal dysfunction in diabetes mellitus 227

B. Schulz, S. Knospe, D. Michaelis, H. Bibergeil: Insulin responsiveness of adipose tissue from normal weight subjects with early diabetes 235

J. Mc Gadey: A staining sequence for the differentiation of A-, B-, and D-cells of the islets of guinea-pig pancreas 243

E. Kohler, K. J. Sheth, T. A. Good: Urinary acidic glycohydrolases as an index of kidney damage in juvenile diabetes mellitus 247

R. A. de Fronzo, J. Tobin, G. Boden, R. Andres: The role of growth hormone in the glucose intolerance of uremia 279

J.-E. Campillo, A. S. Luyckx, P. J. Lefebvre: Effect of oleic acid on arginine-induced glucagon secretion by the isolated perfused rat pancreas 287

A. Angeli, U. Ramenghi, S. del Bello, G. Gaidano, F. Cerutti, S. Baratono: Increased plasma corticosteroid-binding globulin in insulin-dependent pubertal diabetics: relationships with other glycoproteins, growth hormone and prolactin 295

J. Ludvigsson, Y. Larsson: Family history in classical juvenile onset diabetes in relation to severity of the disease 305

A. Puxeddu, P. Brunetti, G. Calabrese, L. Scionti, M. de Angelis, N. Pentiricci, G. Bolli, M. Massi-Benedetti: Red cell 2,3-DPG levels in diabetic vasculopathy . . 311

A. Gommers, M. Dehez-Delhaye: Effect of maturation and senescence on carbohydrate utilization and insulin responsiveness of rat adipose tissue 317

D. Giugliano, F. Cacciapuoti, M. Verza, G. Rosato, M. Varricchio: Hemodynamic effects of somatostatin in insulin-dependent diabetic subjects 331

S. Kawazu, Y. Kanazawa, E. Miki, M. Hayashi, H. Sando, H. Kajinuma, Y. Iwamoto, Y. Akanuma, K. Kosaka: The production and characteristics of anti-insulin, anti-a-component and anti-proinsulin antibodies in patients treated with monocomponent or conventional insulin 339

D. Giugliano, R. Torella, N. Passariello, S. Sgambato: Somatostatin and insulin secretion in man. II. The effect of theophylline 353

F. Fallucca, A. Russo, F. P. Tinelli, L. Giangrande, C. Pedullà, F. de Gado, A. Pachì: Influence of pregnancy on glucagon levels in insulin-dependent diabetic women . . . 359

CASE REPORT

B. Bruni, M. T. Gandolfo Caramello: Arterial thrombosis of the arm in infant of diabetic mother 85

SHORT COMMUNICATIONS

F. Candura, G. Franco, T. Malamani, A. Piazza: Altered glucose tolerance in carbon disulfide exposed workers 259

G. Robuschi, A. Gnudi, P. Bandini, R. Emanuele, E. Roti: TSH response to TRH in euthyroid insulin-dependent diabetics 265

R. S. Gray, E. H. D. Cameron, B. F. Clarke: Plasma prolactin response to i.v. arginine in insulin-dependent diabetes 269

SUBJECT INDEX: 1979 (Vol. XVI)

Page numbers referring to 'Reviews of Books' are italicized

A

Adipose tissue
in vitro effects on—
of insulin 317
from early diabetes
responsiveness to insulin of— . . 235
from d. subjects 235
from normal subjects 235
from subjects with borderline tolerance
responsiveness to insulin of— . . 235
from young and old rat
effect of insulin on— 317
glucose utilization in— 317
lipolysis in—
effects of propranolol on— . . . 77
effects of somatostatin on— . . . 77

Aorta
esterolytic activity in— wall
and alloxan diabetes 111
lipolytic activity in— wall
and alloxan diabetes 111

Atherogenesis
effects of alloxan diabetes in— . . 111
a book *369*

B

Bladder
disorders of— function
in chemical d.m. 211
in d.m. 211
in pre-diabetes 211

C

Calcium, extracellular
effects of added—
on insulin release from perfused pancreas 9
on insulin release *in vitro* 9
effects of deprivation of—
on insulin release from perfused pancreas 9
on insulin release *in vitro* 9

Carbon disulfide
workers exposed to—
and glucose tolerance 259

Cirrhosis, liver
effects in—
of somatostatin on insulin release 139

Corticosteroids
plasma binding globulin with—
in puberal d. 295

Cortisol in blood
after exercise
in d. subjects 19
in normal subjects 19
in obese subjects 19
after glucose
in asymptomatic reactive hypoglycemia 119
in obesity 119

Cortisone-glucose tolerance test
results of—
in carbon disulfide exposed workers 259

D

Diabetes, early
correlation in— of body fat mass
with glucose tolerance 67
with IRI response to glucose . . 67

Diabetes, juvenile
plasma glucagon in—
after arginine i.v. 359
plasma prolactin in—
after arginine i.v. 269
study in—
of family history of d.m. 305
of HLA-types 305
of remission 305
of symptoms at onset 305
study in— of
hemoglobin A_{1c} 295
HGH levels after arginine . . . 295
plasma corticosteroid binding globulin 295
PRL levels after TRH 295
serum 2-macroglobulin 295
urinary acidic glucohydrolasis . . 247

Diabetes, obese
lipectomy in—
glucose tolerance after— 147
insulin sensitivity after— 147
metabolic effects of— 147
serum FFA after insulin and— . . 147
serum insulin after glucose and— 147

Diabetes in animals, experimental
by alloxan
and esterolytic activity in aorta . . 111
and lipid metabolism 111
and lipolytic activity in aorta . . 111
effects of d. therapy on myocardium 129
lipid metabolism in muscle . . . 95
by hydroxymercuribenzoate
B-cell microscopy in— 35
metabolic studies in— 35
by streptozotocin
effects of— on glomerular membrane 219
effects of— on protein synthesis 219

Diabetes in animals, spontaneous
obese-hyperglycemic mice
effects of food restriction in— . . 27
organ weight in— 27

Diabetes mellitus
review
a book *189, 190*

3,2 di-phospho-glycezate
levels in red cells of—
in d. vasculopathy 311

E

Endocrinology
clinical
a book *190*
pathophysiology
a book *190*

Epinephrine in blood
plasma levels of—
in d. ketoacidosis 157

Epinephrine in urine
excretion of— in 24 h
in d. ketoacidosis 157

Esophagus
diameter of—
in d. subjects 227
dysfunction of—
in d. subjects 227
emptying time of—
in d. subjects 227
gastroesophageal reflux
in d. subjects 227
radiological study of—
in d. subjects 227

Estriol in blood
of d. pregnancies
neonatal vitality and— 105
villous edema of placenta and— 105

Etiology of diabetes mellitus
a review 193

Exercise, muscular
endocrine effects of—
in d. subjects 19
in normal subjects 19
in obese subjects 19
metabolic effects of—
in d. subjects 19
in normal subjects 19
in obese subjects 19

F

Fat mass of body
in early diabetes
and glucose tolerance 67
and IRI response to glucose . . . 67

Fiber, dietary
in human biology
a book *370*

Food restriction
effects of—
on obese hyperglycemic mice . . 27
on organ weights 27

Foot, diabetic
problems of—
a book *191*

G

Glomerulus, renal
basement membrane
effects on— of experimental d.m. 219
effects on— of glucose *in vitro* 219
effects on— insulin *in vitro* . . . 219

Glucagon in blood
after arginine
in d. pregnant women 359
in insulin dependent women . . 359
after exercise
in d. subjects 19
in normal subjects 19
in obese subjects 19
after standard mixed meal
in normal subjects 45
after propranolol infusion 77
after somatostatin infusion 77

Glucagon secretion
from perfused pancreas
after arginine 287
effect of oleic acid on— 287
NEFA and— 287

Glucose in blood
after exercise
in d. subjects 19
in normal subjects 19
in obese subjects 19
after glucagon
in liver cirrhosis 139
and somatostatin 139
after standard mixed meal
in normal subjects 45

Glucose tolerance i.v.
correlation of—
with body fat mass 67
results of—
in early diabetes 67

Glucose tolerance, oral
effects on— of lipectomy
in obese d. 147

Glucosylated hemoglobin
blood levels of
in puberal d. 295
in d. neuropathy 205

Glycohydrolases, acidic
urinary excretion of—
in juvenile diabetes 247

Glycosuria
effects on—
of NPH and PZI in d. children 63

Glycerol in blood
after exercise
in d. subjects 19
in normal subjects 19
in obese subjects 19

H

Heart
d.m. and
a book *371*
hemodynamic parameters
somatostatin and— 331
in experimental d.
effects of d. therapy in— 129
study of cardiac output index in— 129
study of connective tissue in— . . 129
study of passive elastic modulus . 129

Hemoglobin A_{1c}, see
Glucosylated hemoglobin

Heredity of diabetes mellitus
and HLA-types in JOD 305
and remission of JOD 305
and symptoms at onset of JOD . . 305
some aspects in—
a review 193
study of— in JOD 305

Hernia, hiatal
in d. subjects 227

HLA - types
study of—
and family history in JOD . . . 305
in JOD 305

Hydroxymercuribenzoate
administration in mice of—
and acid-base balance 35
and blood glucose 35

Hyperlipidemia
d.m. and
a book *189*
obesity and—
a book *189*

Hypoglycemia
asymptomatic reactive
serum estriol after glucose in— . . 119
serum HGH after glucose in— . . 119

I

Infant of diabetic mother
Apgar score in—
and serum estriol 105
arterial thrombosis in—
case report 85
vitality in—
and serum estriol 105

Insulin
aggregates
and binding with glucose 169
effects *in vitro* of—
on glomerular basement membrane 219
on protein synthesis in renal glomeruli 219
interaction of—
with glucose 169

Insulin, antibodies
and a-component of insulin 339
in subjects treated with—
beef insulin 339
conventional insulin 339
monocomponent insulin 339
pork insulin 339

Insulin in blood
after exercise
in d. subjects 19
in normal subjects 19
in obese subjects 19
after glucagon
and somatostatin 139
in liver cirrhosis 139
after glucose
and body fat mass 67
lipectomy and— in obese d. . . . 147
in early d. 67
in obese d. 67
after glucose i.v.
and somatostatin 353
and theophylline 353
after propranolol infusion 77
after somatostatin infusion 77
after standard mixed meal
in normal subjects 45

Insulin secretion
from isolated islets
and extracellular calcium 9
and extracellular magnesium . . . 9
from perfused pancreas
and extracellular calcium 9
and extracellular magnesium . . . 9

Insulin sensitivity
of adipose tissue *in vitro*
in d. subjects 235
in early d. 235
in normal subjects 235
in subjects with borderline tolerance 235
in obese d. after lipectomy 147

Islets, pancreatic
A, B, D, cells of—
staining technique for the differentiation of— 243
diabetes and—
a book *368*
ultrastructural study of—
after hydroxymercuribenzoate . . 35

Islet transplantation
results of—
on glucose tolerance 1
in rat with d. by streptozotocin . . 1

K

Ketoacidosis, diabetic
study of epinephrine in—
blood 157
urine 157
study of norepinephrine in—
blood 157
urine 157

L

Lactate in blood
after standard mixed meal
in normal subjects 45

Lipectomy
effects of—
in obese subjects 147

Lipoproteins, low density
atherosclerosis and—
a book *367*

metabolism of—
a book 367
structure of—
a book 367

M

α, *Macroglobulin*
blood levels of—
in puberal d. 295

Magnesium, extracellular
effects of added—
on insulin release *in vitro* . . . 9
on insulin release from perfused pancreas 9
effects of deprivation of—
on insulin release *in vitro* . . . 9
on insulin release from perfused pancreas 9

Metabolism of lipids
in muscle of d. rats 95

Muscle
lipid metabolism in—
of d. rats 95

Muscles, extraocular
histological study of—
in d.m. 55

N

NEFA
effects of—
on glucagon secretion *in vitro* . . 287

NEFA in blood
after exercise
in d. subjects 19
in normal subjects 19
in obese subjects 19
after insulin
in d. obese after lipectomy . . . 147
after propranolol infusion 77
after somatostatin infusion 77
after standard mixed meal
in normal subjects 45

Nephropathy, diabetic
and urinary acidic glycohydrolases . 247

Neuropathy, autonomous
esophageal dysfunction
study in d. subjects 227
glycosylated Hb concentration in— . 205
metabolic control and— 205

Neuropathy, peripheral
glycosylated Hb concentration in— . 205
metabolic control and— 205

Norepinephrine in blood
plasma levels of—
in d. ketoacidosis 157

Norepinephrine in urine
excretion of— in 24 h
in d. ketoacidosis 157

Nutrition
fiber in human biology
a book 367

O

Obesity
asymptomatic reactive hypoglycemia in—
serum cortisol after glucose in— . 119
serum HGH after glucose in— . . 119
d.m. and—
a book 189, 370
hyperlipidemia and—
a book 189
lipectomy in—
glucose tolerance after— 147
insulin sensitivity after— 147
metabolic effects of— 147
serum insulin after glucose and— . 147
serum NEFA after insulin and— . 147
treatment of—
a book 367

Oleic acid
effects of—
on glucagon secretion *in vitro* . . 287

Ophthalmoplegia, diabetic
axonal changes in— 55
histological study of— 55
myelin changes in— 55

P

Pathogenesis of diabetes mellitus
some aspects in—
a review 193

Placenta
of d. women
villous edema in— 105

Pregnancy in diabetic women
plasma glucagon in—
after arginine i.v. 359

Proinsulin, antibodies
in subjects treated with—
beef insulin 339
conventional insulin 339
monocomponent insulin 339
pork insulin 339
Prolactin in blood
after arginine i.v.
in JOD 269
after TRH
in puberal d. 295
Propranolol
infusion of—
and plasma glucagon 77
and plasma insulin 77
and plasma NEFA 77
Protein synthesis
in renal glomeruli
effects of experimental d. 219
effects of insulin *in vitro* 219
effects of glucose *in vitro* . . . 219

R

Red cells
3,2 DPG in—
in d. vasculopathy 311
Remission of diabetes mellitus
family history and— 305
HLA types and— 305
Retinopathy, diabetic
red cells 3,2 DPG in— 311

S

Somatostatin
hemodynamic effects of—
in d. subjects— 351
infusion of—
and basal glucagon 77
and basal insulin 77
and plasma NEFA 77
in vivo effects of—
on blood insulin after glucose . . 353
and theophylline 353
Somatostatin in blood
after glucose
in uremia 279
fasting levels of—
in uremia 279
Somatotropin in blood
after arginine
in puberal d. 295
after exercise
in d. subjects 19
in normal subjects 19
in obese subjects 19
after glucose
in asymptomatic reactive hypoglycemia 119
in obesity 119

T

Theophylline
administration of—
and somatostatin inhibition of insulin secretion 353
Therapy of diabetes mellitus, insulin
antibodies to insulin
and conventional insulin 339
and monocomponent insulin . . . 339
comparison between NPH and PZI in children 63
effects of long-term—
on myocardium 129
Therapy of diabetes mellitus, oral
effects of long-term carbutamide therapy on myocardium 129
effects of long-term glibenclamide therapy on myocardium 129
Thyroid function
in d. with antithyroid antibodies . . 265
in d. without antithyroid antibodies . 265
Thyrostimulin in blood
after TRH
in d. with antithyroid antibodies . 265
in d. without antithyroid antibodies 265
in insulin-dependent d. 265

U

Uremia
decrease of glucose tolerance in— . . 279
serum HGH after glucose in— . . . 279
serum HGH fasting levels in— . . . 279

V

Vasculopathy, diabetic
red cells 3, 2 DPG in— 311
